GOKULAKRISHNAN A

Full Stack Developer

Tiruchengode, Tamil Nadu | +91 8608093474 | agokul110@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer specialising in the MERN Stack and Next.js, with hands-on experience delivering production-ready web applications featuring real-time communication (Socket.IO, WebRTC), AI/NLP integrations, JWT-secured RESTful APIs, and role-based access control. Demonstrated ability to architect scalable, end-to-end systems — from responsive React/Next.js frontends to robust Node.js/Express.js backends and MongoDB schema design — with 2 live projects deployed and publicly available. Seeking a software engineering role to build impactful, user-centric products that solve real-world problems.

TECHNICAL SKILLS

Frontend	React.js, Next.js (SSR/SSG), Tailwind CSS, Bootstrap, Responsive Web Design
Backend	Node.js, Express.js, RESTful API Design, MVC Architecture
Real-Time & Media	Socket.IO (WebSocket), WebRTC (Video & Audio Calling)
Database & Security	MongoDB, Mongoose ODM, JWT Authentication, Role-Based Access Control (RBAC)
AI / NLP	Natural Language Processing, Keyword Analysis, Web Speech API
Languages & Tools	JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Git, GitHub, Vercel, Postman

EXPERIENCE

Full Stack Engineer Intern *Oct 2025 – Present*
Cyberdude Networks *Tiruchengode, India*

- Developed and shipped 3+ full-stack MERN features per sprint, translating business requirements into production-ready code reviewed and merged within 24-hour turnaround cycles.
- Designed and documented RESTful APIs tested via Postman, integrating React.js frontends with Node.js/Express.js backends; maintained clean commit history using Git feature-branching workflow.
- Reduced schema query complexity by refactoring 4 MongoDB collections, improving data retrieval efficiency and applying industry-standard API security practices under senior mentorship.

PROJECTS

SkillSwap – Peer-to-Peer Skill Exchange Platform | **Live Demo** | *Next.js, Node.js, Express.js, MongoDB, Socket.IO, WebRTC, JWT* *2026*

- Architected and delivered a full-stack platform supporting peer skill exchange across 5+ skill categories, with matching algorithms, connection requests, and session-based progress tracking.
- Engineered real-time bidirectional chat using **Socket.IO** and zero-plugin in-browser video/audio calling via **WebRTC**, serving up to 50+ concurrent sessions without third-party conferencing services.
- Launched an admin-verified job and internship module with role-separated dashboards; secured all routes with **JWT** and **RBAC**, reducing unauthorised access surface by enforcing strict user/admin boundaries.
- Achieved ∼40% faster initial page load by leveraging **Next.js SSR**, improving Lighthouse performance scores and SEO across all dynamic routes.

NyayaLite – AI-Powered Legal Assistant | **Live Demo** | *MongoDB, Express.js, React.js, Node.js, NLP, Web Speech API* *Oct 2025 – Present*

- Delivered a LegalTech MERN application providing instant guidance across 60+ Indian legal sections; mapped user-described incidents to relevant laws and procedural steps via **NLP** and keyword-based analysis.
- Integrated **Web Speech API** for real-time voice recognition and shipped multilingual support covering 3 languages, broadening platform accessibility for non-technical and rural users.
- Engineered a structured legal knowledge base in **MongoDB** with 50+ pre-built document templates; reduced average legal query resolution time from manual search to under 3 seconds.

EDUCATION

B.Tech in Information Technology | Relevant: Data Structures, DBMS, Web Technologies, OS *Aug 2022 – May 2026*
JKK Nataraja College of Engineering and Technology, Tiruchengode

CORE COMPETENCIES

Full Stack Development | MERN Stack | RESTful API Design | Real-Time Applications | WebSocket | WebRTC | Server-Side Rendering | JWT Authentication | Role-Based Access Control | NLP Integration | Database Schema Design | Agile Development
